EDUCATION

Educational complex of the Author's Physics and Mathematics School-Lyceum
No. 61 | 2012-2023

High school

The school with the highest number of achievement levels in the last 10 years on nationwide test. Curriculum with advanced study of mathematics, physics and informatics.

GPA 5.0/5.0 (the top 1% of the graduating class)

11th grade examinations: 5.0/5.0

Istanbul Technical University | 2024-2028

Bachelor of Artificial Intelligence and Data Engineering

the leading technical university in Europe. According to QSrankings it is ranked 79th in the world within Engineering and Technology and is the fastest growing university in Europe.

Current GPA: 3.24/ 4.0

WORK EXPERIENCE

Paywall RUS LLC | 2025 - 2026

Frontend Developer

Accelerated frontend delivery by completing assigned tasks ahead of release timelines. Developed responsive layouts for new frontend content and fixed UI bugs. Collaborated with the team through code reviews, task tracking, and release preparation.

Kvantland | 2025 - Present

Fullstack Developer / Team Lead

Performed full-stack development cycle for an educational math Olympiad platform, implementing problem-solving features on both frontend and backend. Built interactive real-time components that guide students through Olympiad-style problems and respond dynamically to user input.

Promoted from Full-Stack Developer to Team Lead to manage the complete product development cycle, including development, testing, deployment, and release coordination. Led a 3-person developer team by distributing tasks, tracking progress, resolving blockers, conducting code reviews, and ensuring timely feature delivery

Tochno Construction company | 2025 - Present

Software Engineer

Managed the full development lifecycle of business process solutions, from technical requirements planning to deployment and ongoing product support. Developed internal assistant services for employees across 5 departments, improving workflow efficiency and operational productivity.

WORK EXPERIENCE

Biamino | 2024 - 2025

Developer Intern

Worked as a frontend developer in the development of an investment web platform with AI implementation. Customized the API and connected the backend and frontend. Developed a telegram bot with implementation of python libraries tesseract and gemini AI model API.

Logos group | 2024 - 2026

Math tutor

Held group math lessons in English to prepare high school students for SAT exam.

Onstudy Prep | 2024 - 2025

Math tutor

Conducted one-on-one tutoring sessions with middle and high school students in mathematics.

PROJECTS

mstarter.kz | 2025

- Developed the frontend for an online e-commerce store from scratch using Next.js.
- Implemented responsive design with Tailwind CSS, ensuring seamless adaptation for mobile devices and tablets.
- Led the development process and structured the project architecture for scalability and maintainability.
- Fully maintain the project by implementing updates across the frontend, backend, and server infrastructure.
- Strengthened the project's cybersecurity after an attempted breach by improving protection measures and securing vulnerable areas.

elit-stom-med.ru | 2025

- Migrated the company website to Tilda to simplify maintenance, reduce operating costs, and improve the overall design.
- Collaborated with the marketing specialist to redesign the website, add new UI solutions, and improve the user journey.
- Simplified the lead submission flow, resulting in a 2x increase in received applications.

tochno-generator.ru | 2025

- Developed an image-generation service for the marketing team to create story visuals.
- Optimized and restructured a database containing 10,000 apartment records, significantly improving website performance and response speed.
- Designed an intuitive interface and user flow that allowed to generate visuals with apartment layouts, unique property attributes, and residential complex details.
- Built an integrated calculator that performed all required calculations based on internal business rules and pricing programs.
- Increased the marketing team's story production output by 3x through process automation, improved usability, and faster content generation.

PROJECTS

parkovki-zhk.ru | 2026

- Developed a user-friendly parking reservation platform.
- Integrated an interactive SVG map, allowing users to easily view and select available parking spots.
- Increased parking rental requests by 50% by improving accessibility, usability, and the booking experience.

Image Captioner | 2026

- Built an AI-powered Streamlit app that allows users to upload images, preview them in the interface, and instantly generate descriptive captions using a computer vision model.
